PROFESSIONAL SUMMARY

.NET Backend Engineer with 4+ years of experience specializing in **modernizing legacy enterprise systems into scalable .NET Core architectures**. Proven track record of migrating monolithic .NET Framework applications to high-performance APIs and cloud-ready systems across fintech, real estate, and public-access platforms. Strong expertise in performance optimization, large data processing, and enterprise-grade backend design.

CORE EXPERTISE

- Legacy System Modernization (.NET Framework → .NET Core / .NET 9)
 - High-Performance REST API Development
 - System Design & Scalable Architecture
 - Asynchronous Processing & Large Data Handling
 - SQL Optimization & Query Performance Tuning
 - Authentication & Role-Based Security
 - CI/CD (Azure DevOps, Octopus)
-

TECHNICAL SKILLS

Languages: C#, SQL, TypeScript, JavaScript **Frameworks:** .NET Core, .NET 9, ASP.NET Web API, Blazor Server, WPF, Angular **Databases:** SQL Server, MySQL **Tools:** Azure DevOps, Octopus Deploy, Git, Postman **Concepts:** Clean Architecture, REST APIs, Unit Testing, Agile/Scrum

PROFESSIONAL EXPERIENCE

Intermediate Software Developer

Insignia Software — Islamabad, Pakistan | May 2025 – Present

- Leading backend development for a **Blazor Server application built on .NET 9** for public-access library systems
- Migrated legacy .NET Framework modules into modern, maintainable .NET services
- Designed and optimized large-scale data processing workflows for file imports and transactions

- Implemented asynchronous backend operations improving system responsiveness
 - Built role-based authentication and secure access layers
 - Collaborated with cross-functional teams to deliver enterprise-grade features
-

Full Stack .NET Developer

Ciklum — Islamabad, Pakistan | Feb 2024 – May 2025

Project: Energy Efficiency SaaS Platform (Real Estate Analytics)

- Migrated legacy .NET Framework system to **.NET Core-based microservices and APIs**
 - Developed scalable backend APIs supporting analytics for energy consumption data
 - Optimized SQL queries and backend performance, significantly reducing response times
 - Improved global exception handling, reducing production issues by ~30%
 - Deployed and monitored applications using Azure and Octopus
 - Collaborated with European stakeholders on architectural improvements
-

Software Engineer

Netsol Technologies — Lahore, Pakistan | Jul 2022 – Mar 2024

Project: Finance Leasing & Contract Management System

- Modernized legacy financial systems by converting .NET Framework code into **modular APIs**
 - Developed WPF modules for contract lifecycle management
 - Implemented backend integrations and client-specific financial workflows
 - Performed SQL-based data corrections ensuring high data integrity in production systems
-

Python Developer Intern

ASTech — Lahore, Pakistan | Apr 2022 – Jul 2022

- Contributed to ERP modules by implementing business logic and resolving bugs
-

KEY PROJECT HIGHLIGHTS

Legacy System Modernization (Multi-Project Experience)

- Successfully migrated multiple enterprise systems from **.NET Framework to .NET Core / .NET 9**
- Improved maintainability, scalability, and performance across systems

Enterprise Data Processing

- Built backend processes handling **large datasets and file uploads** with optimized performance
-

EDUCATION

BS Information Technology

Punjab University College of Information Technology (PUCIT)

LANGUAGES

English: Advanced (C1) Urdu: Native

POSITIONING STATEMENT (FOR RECRUITERS)

Specializing in: ✓ Legacy .NET modernization ✓ High-performance backend systems ✓ Enterprise API architecture

Target Roles:

- Senior .NET Backend Engineer
- .NET Migration Specialist
- Backend/API Engineer (Remote)
